

The logo for Pedagogue Assessment Management Solutions features the word "Pedagogue" in a large, stylized, 3D-effect font. Above it, the words "Assessment Management Solutions" are written in a smaller, sans-serif font. The background of the logo is a yellow-to-green gradient.

Pedagogue

Assessment Management Solutions

Providing Global Online Testing Solutions

PEDAGOGUE® SOLUTIONS IS THE LEADING SUPPLIER OF ONLINE TESTING SOFTWARE AND SERVICES.

About Pedagogue Solutions:

Pedagogue Solutions has been the leading online testing company for 20 years. We are a full service assessment provider offering testing software, hosting, administrative and technical services, professional consulting, and assessment design.

We are committed to serving the testing needs of the global corporate enterprise community with flexible, affordable, top-quality solutions. Our products and services are designed to help our clients create fair, valid and reliable measurements.

Our expert staff includes test validation experts, programmers, software designers, project managers, testing portal managers, and administrative support personnel. Our technical group ensures that our software and hosting services are of the highest quality; our professional services group provides best practices in question writing, test validation and assessment strategy.

Our products and services:

Pedagogue® Assessment Management System (AMS)

The Pedagogue® Assessment Management System (AMS) allows enterprise-wide distribution of knowledge-based testing through a web browser. The PedagogueAMS assessment platform is used for authoring, administering, delivering, and analyzing assessments. For those with the resources to administer the platform themselves, we license the complete PedagogueAMS. Clients host the software internally (often interfaced to an LMS or HR system), and after a one day training workshop are ready to set up system security, create questions, structure the item pool, develop assessments, make assignments, and run reports and evaluations using internal staff.

ExamsDirect®

ExamsDirect is our fully hosted and managed assessment service. Our clients provide us with the test questions and student rosters; we do the rest. We provide the software, the hosting platform and all administrative services. With a very modest startup fee and fixed monthly hosting costs the ExamsDirect program is a truly affordable solution, providing clients with staffing flexibility and substantial cost savings. ExamsDirect is also available as a self administered service. We host the software but you do the administrative work yourself, as if the software were installed behind your firewall.

Test development and validation services

Pedagogue provides test development and psychometric services – helping our clients ensure the validity of their testing programs. We help our clients ensure that they have a defensible assessment strategy, passing scores set via a valid and defensible process, tests written to job requirements, and questions written to professional standards. Pedagogue also offers a popular workshop on "Best Practices in Test Development and Validation"

Pedagogue Solutions is dedicated to the creation and delivery of fair, valid, and reliable tests .

Will this work for my business?

Global companies

Pedagogue Solutions has a long and successful track record supplying assessment solutions to many of the top Fortune 500 corporations. The Pedagogue Assessment Management System was created with the enterprise community in mind. With a top-down reporting structure, over 100 user-definable administrative roles and privileges, secure "domains" and 18 languages, Pedagogue was created to meet the unique needs of the global corporate enterprise.

Small to mid-sized companies

Small and mid-sized businesses with limited resources benefit from Pedagogue's fully hosted and managed assessment services. ExamsDirect was created to provide the same powerful assessment capabilities that are available to large corporations, but at a much lower cost. We fully host and manage the system, saving clients IT costs and providing outsourced staffing flexibility.

Many of our clients take advantage of our hosted online testing service, ExamsDirect®, while others license the system for in-house installation.

With either program, your data can be migrated as needs change, since the Pedagogue AMS platform is common to all approaches.

Where do I start?

Join the many successful companies whose assessments are Powered by Pedagogue®.
